### The AURA Patch

*The Aura Patch is a small energy patch that attaches to the body and presents a field of supportive and restorative energy back into the body's energetic field.*

*This is the same abundant energy that we find around and inside the healthiest people on Earth.*

*It creates a healthy environment in which your body can thrive.*

## Healing Energy: Body Software

*By Linda Hegstrand, MD, PhD*

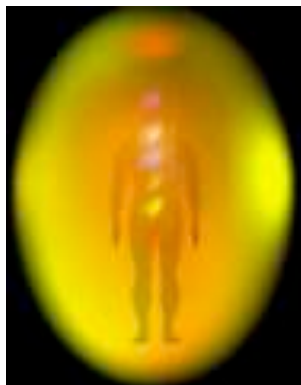

**W**ithout energy, there is no life. Before pharmaceuticals became available to physicians, their primary treatment “medicines” were homeopathic remedies. In fact, University of Michigan Medical School was considered the number one medical school in homeopathy. Homeopathy is a system for treating health challenges based on the administration of minute doses of natural substances that in massive amounts produce symptoms in healthy individuals similar to those of the disease itself: Likes treat likes. Allopathic medicine considers giving such low doses of medications ineffective.

There are over 1/2 million homeopathic physicians worldwide and 500 schools of homeopathy. Clinically, homeopathy WORKS in both acute and chronic conditions when the correct remedies in the appropriate dilution(s) are given. This works through the energetics of remedies, not through chemistry. The latter is how pharmaceuticals work. An excellent website on homeopathy is [www.hpathy.com](http://www.hpathy.com).

Bio-photonic messages determine the behavior of all chemical reactions. Yes, biochemistry and biophysics work in harmony. Both chemical and energetic balances are essential for wellness. An energetic message PRECEDES all chemical reactions. These energetic messages tell chemicals how to react. Energetic messages cause physiologic changes without the presence of chemical messengers. Fritz Albert Popp, PhD won the Nobel Prize for this brilliant discovery. The human body is the most “advanced computer.” It receives energetic messages (body software) and responds appropriately.

Homeopathic (energetic) remedies, which are really body software, are generally delivered in water with alcohol as a preservative or on tiny sugar pills (too small to adversely effect diabetics). A brilliant homeopathic physician, Dr. Rick Hunt, has developed a third delivery system: Aura Patches.

The Aura Patch is a small, energy patch that attaches to the body and delivers a field of supportive and restorative energy back into the body's energetic field.

## Healing Energy: Body Software, cont.

This delivery system transmits only energy. There are NO chemicals that enter the body. Each patch has many frequencies that work in harmony. The body chooses the frequencies it needs to inactivate microorganisms, toxins, and abnormal cells and to bring the various organ systems into energetic balance.

Every virus, bacteria, yeast, parasite, abnormal cell, and toxin presents a very specific digital frequency signature. When the specific frequency is delivered to the body, it inactivates microorganisms, toxins, and abnormal cells. The patches are a delivery system for doing just this. There are currently 28 different types of patches.

This delivery system is the most clinically effective way of treating chronic conditions that are plaguing over half of the population. It is also the most economical healing modality I am aware of. This is becoming the method of choice for most of my patients who are seeking natural approaches to healing. Generally, when something is too good to be true, it is not true. There are exceptions to every rule and the Aura Patches are one of these.

As previously mentioned, our bodies need both energetic and chemical balance. One needs nutrients for the energetic signals to work, i.e. one needs both hardware and software. In order to give most effectively what patients need to be well, an evaluation is necessary. We are unique individuals. We are a dance between our genetics and our environment. As the old adage says: "One shoe does not fit all."

*Linda Hegstrand, MD, PhD owns the The Complete Wellness Center in Grand Rapids MI and is accepting new patients. A personalized approach is designed using both energy and nutrition to give patients what they need to heal.*

## How The Patches Work

The AURA Patch System is made as an energy delivery system. They are worn on the left-side of the body above the waist and provide specific energy patterns that are found in people with abundant good health. By restoring these energy patterns, we have observed a positive change in people's health.

The patches are programmed with completely natural frequencies with no side-effects. There is nothing synthetic in the therapy and there is no chemistry that passes through the skin. A series of twenty-eight different therapies are available that support and restore vital energetics to the human body.

*"The Aura Patch System™ was developed as a complete therapy program and has been accepted by Homeopathic Doctors and Practitioners as an aid to support and restore the body's energetic function."*

## How The Patches Work, continued

We write the software and program specific frequencies onto a proprietary sub-straight material. This material is then charged with energetic electromagnetic frequencies that the body can absorb and assimilate as energy.

The patch system is a non-Transdermal and non-chemical patch that delivers natural energetic frequencies that allows the body to heal itself. They are designed to create specific biological information signals that the body chooses to accept or reject in order to maintain perfect balance.

The physical body is able to choose the frequency needed to maintain its balance. Instead of putting a substance into the body, i.e. drug or supplement, this technology provides the frequency signature of the substance that is needed by the body to create and maintain balance that achieves health benefits.

*The Aura Patches are flexible.*

## Supportive Science and Technology

In recent studies of the human body, bio-energy frequencies provide an important and vital function in our lives, whether we understand this phenomenon or not, weak and dysfunctional frequencies can determine one's health and energetics. At Aura International, we understand the benefits of healthy functioning frequencies that are emitted from our bodies. With the Aura Patch System we duplicate these energetics onto an advanced material (developed for NASA).

Doctor Fritz Albert Popp, a German physicist won a Nobel Prize for his discovery that is used in the application of the Aura patches. He identified and measured electrical impulses that create an electromagnetic network, which controls every organ and its function in your body. He named these electrical impulses Biophotons.

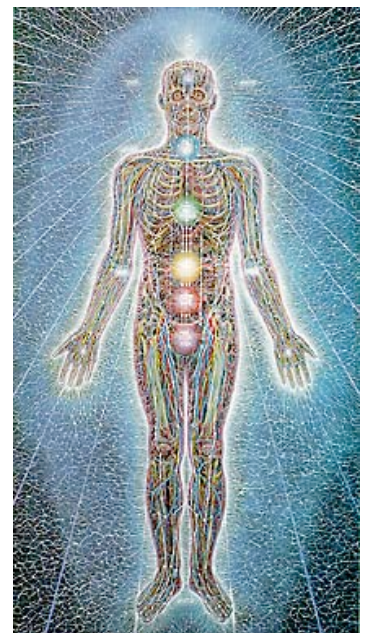

He believed that these tiny packets of vital information, which are communicated from cell to cell throughout the entire body, are the beginning of good or bad health. In creating the patches, a software program is first written for each therapy with specific frequencies. These electromagnetic frequencies emulate energetic frequencies from nature that can be translated into digital signals.

We have a tendency to think of ourselves as purely physical beings, but that is only half of the story. We are actually divided into two distinctly different halves. There is the physical body we see, but there is also your invisible being. It is a complex pattern and structure of pure energy. It moves through 12 pathways that guide this energy to every organ in your body. In Eastern Medicine, the Energetic half of your whole body has been intensely studied for almost 5000 years and is believed to be the beginning of true and lasting health. This type of technology has been successfully used in health care since the 1930s. The development of the MRI (Magnetic Resonance Imaging) is a direct result of the expansion of this technology.
